Casey Meza St Marys Hospital P.O. Box 137 Cottonwood, Idaho 83522

Dear Ms. Meza:

This is to advise you of the findings of the Complaint survey at St Marys Hospital which was concluded on May 7, 2008.

Enclosed is a Statement of Deficiencies/Plan of Correction, Form CMS-2567, listing Medicare deficiencies and a similar form listing State licensure deficiencies. In the spaces provided on the right side of each sheet, please provide a Plan of Correction. It is important that your Plan of Correction address each deficiency in the following manner:

- 1. Answer the deficiency statement, specifically indicating how the problem will be, or has been, corrected. Do not address the specific examples. Your plan must describe how you will ensure correction for <u>all</u> individuals potentially impacted by the deficient practice.
- 2. Identify the person or discipline responsible for monitoring the changes in the system to ensure compliance is achieved and maintained. This is to include how the monitoring will be done and at what frequency the person or discipline will do the monitoring.
- 3. Identify the date each deficiency has been, or will be, corrected.
- 4. Sign and date the form(s) in the space provided at the bottom of the first page.

After you have completed your Plan of Correction, return the original to this office by May 29, 2008, and keep a copy for your records.

Casey Meza May 16, 2008 Page 2 of 2

Thank you for the courtesies extended to us during our visit. If you have any questions, please call or write this office at (208)334-6626.

Sincerely,

GARY GUILES

May 16, 2008

Casey Meza P.O. Box 137 Cottonwood, Idaho 83522

Provider #131321

Dear Ms. Meza:

On May 7, 2008, a Complaint Survey was conducted at St Marys Hospital. The complaint allegations, findings, and conclusions are as follows:

Complaint #ID00003404

Allegation: A patient appeared to be demented and wandered the halls unattended. This patient went into other patient's rooms, yelled at them and threatened them. The patient was also observed reading other patient's charts.

Findings: An unannounced visit was made to the hospital on 5/7/08. Medical records of four patients, including three closed and one current patient, were reviewed. Hospital policies and incident reports were reviewed. Staff were interviewed.

One medical record documented a 77 year old female admitted to the hospital from 9/13/07 to 10/25/07. She was again admitted on 10/30/07 until 12/1/07. Her diagnosis was dementia and she was admitted the first time after a fall. Nursing notes described the patient as confused and psychotic and aggressive at times. Incidents of intrusive wandering were documented during the middle of November 2007. Nurses documented the patient had gone into other patients' rooms and had threatened them, i.e., to throw a "Sera lift" on them. No attacks were documented. The patient also fell four times during this period without apparent injury. Her physicians tried various medical interventions during this time. A nursing plan of care to address the specific behaviors and supervise the patient was not present in the record. No other patients with behavioral issues were identified.

Two registered nurses who cared for the patient were interviewed. They stated the patient had threatened to kill staff and other residents and had threatened to drag one patient out of bed. They stated the patient had not physically acted out against any patients. They said she had been combative with staff at times, especially during care. They stated the patient would be very sweet one minute and then change very suddenly and threaten people. The nurses said they had increased staff to supervise the patient. They said the patient was sufficiently supervised that they believed other patients were safe. The Director of Nursing was also interviewed. She stated a specific plan of care to address the patient's behaviors and supervise the patient was not present in the record.

Incident reports from September 2007 through April 2008 were reviewed. Except as noted above, no incidents involving patient to patient aggression were documented. Also, a low number of falls were documented.

Standard level federal and state deficiencies were cited at 42 CFR 485.635(d,4) and IDAPA 16.03.14310.03, respectively, because of the lack of sufficient care planning.

Conclusion: Substantiated. Federal and State deficiencies related to the allegation are cited.

Based on the findings of the complaint investigation, deficiencies were cited and included on the survey report. No response is necessary to this complaint report, as it was addressed in the Plan of Correction.

If you have questions or concerns regarding our investigation, please contact us at (208) 334-6626. Thank you for the courtesy and cooperation you and your staff extended to us in the course of our investigation.

Sincerely,

GARY GUILES
